Chapter 4

Dairy products; birds eggs; natural honey; edible products of animal origin not elsewhere specified or included

- Notes:**
1. The expression “milk” means lull cream milk or partially or completely skimmed milk.
 2. For the purposes of Tax 04.05:
 - (a) The term “butter” means natural butter, whey butter or recombined butter (fresh, salted or rancid, including canned butter) derived exclusively from milk, with a milkfat content of 80% or more but not more than 95% by weight, a maximum milk solids-not-fat content of 2% by weight and a maximum water content of 16% by weight. Butter does not contain added emulsifiers, but may contain sodium chloride, food colors, neutralizing salts and cultures of harmless lactic-acid- producing bacteria.
 - (b) The expression “dairy spreads” means a spreadable emulsion of the water-in-oil type, containing milkfat as the only fat in the product, with a milkfat content of 39% or more but less than 80% by weight.
 3. Products obtained by the concentration of whey and with the addition of milk or milkfat are to be classified as cheese in Tax 04. 06, provided that they have the three following characteristics:
 - (a) A milkfat content, by weight of the dry matter, of 5% or more;
 - (b) A dry matter content, by weight, of at least 70% but not exceeding 85%; and
 - (c) They are molded or capable of being molded.
 4. This Chapter does not cover:
 - (a) Products obtained from whey, containing by weight more than 95% lactose, expressed as anhydrous lactose calculated on the dry matter (Tax 17. 02);
 - (b) A product made of a substance (e.g., oleic acid ester) instead of one or more natural ingredients (e.g., butyrate) in milk.
 - (c) Albumins (including concentrates of two or more whey proteins, containing by weight more than 80% whey proteins, calculated on the dry matter) (Tax 35.02) or globulins (Tax 35.04)

Tax Notes:

1. For the purpose of Tax 0404.10, the expression “modified whey” means products consisting of whey constituents, that is, whey from which all or part of the lactose, proteins or minerals have been removed, whey to which natural whey constituents have been added and products obtained by mixing natural whey constituents.
2. For the purposes of Tax 0405. 10 the term “butter” does not include dehydrated butter or ghee (Tax 0405.90).

Chapter 8

Edible fruit and nuts; peel of citrus fruit or melons

- Notes:**
1. This Chapter does not cover inedible nuts or fruits.
 2. Chilled fruits and nuts are to be classified as the corresponding fresh fruits and nuts.
 3. Dried fruit or dried nuts of this Chapter may be partially rehydrated, or treated for the following purposes:
 - (a) For additional preservation or stabilization (for example, by moderate heat treatment, sulfuration, the addition of sorbic acid or potassium sorbate).
 - (b) To improve or maintain their appearance (for example, by the addition of vegetable oil or small quantities of glucose syrup), provided that they retain the character of dried fruit or dried nuts.

SECTION IV

Prepared Foodstuffs; Beverages, Spirits and Vinegar, Tobacco and Manufactured Tobacco Substitutes

Note:

In this Section, the term “pellets” means products which have been agglomerated either directly by compression or by the addition of a binder in a proportion not exceeding 3% by weight.

Chapter 16

Products of meat, of fish or of crustaceans, molluscs or other aquatic invertebrates

Note:

1. This Chapter does not cover meat, meat offal, fish, crustaceans, molluscs or other aquatic invertebrates, prepared or preserved by the processes specified in Chapter 2 or 3 or Tax 05. 04.

2. Food products in this Chapter provided that they contain more than 20% by weight of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof. In cases where the preparation contains two or more of the products mentioned above, it is classified in the corresponding Tax of Chapter 16 based on the largest component or components by weight. These provisions do not apply to the stuffed products of Tax 19. 02 or to the products of Tax 21. 03 or 21. 04.

Tax Notes:

3. For the purposes of Tax 1602. 10, the expression “homogenized products” means products of meat, offal or blood, finely homogenized, put up for retail sale suitable for infants to eat or for dietetic purposes, of which a net weight content not exceeding 250g. For seasoning, preservation or other purposes, a small amount of other ingredients can be added to the homogenized food, as well as a small amount of visible meat particles or edible scraps. This Tax takes precedence over other Tax of Tax 16.02.

2. The common names of fish, crustaceans, molluscs and other aquatic invertebrates are listed in Tax 16.04 or 16.05. They are the same as those of fish, crustaceans, molluscs and other aquatic invertebrates with the same names in Chapter 3.

Chapter 26
Ores, slag and ash

Notes:

1. This Chapter does not cover:
 - (a) Slag or similar industrial waste prepared as macadam (Tax 25. 17);
 - (b) Natural magnesium carbonate (magnesite), whether or not calcined (Tax 25. 19);
 - (c) Sludges from the storage tanks of petroleum oils, consisting mainly of such oils (Tax 27. 10);
 - (d) Basic slag of Chapter 31;
 - (e) Slag wool, rock wool or similar mineral wools (Tax 68. 06);
 - (f) Waste or scrap of precious metal or of metal clad with precious metal; other waste or scrap containing precious metal or precious metal compounds, of a kind used principally for the recovery of precious metal (Tax 71. 12);
 - (g) Copper, nickel or cobalt mattes produced by any process of smelting (Section XV).
2. For the purposes of Tax 26. 01 to 26. 17, the term "ores" means minerals of mineralogical species actually used in the metallurgical industry for the extraction of mercury, of the metals of Tax 28. 44 or of the metals of Section XIV or XV, even if they are intended for non-metallurgical purposes. Tax 26. 01 to 26. 17 do not, however, include minerals which have been submitted to processes not normal to the metallurgical industry.
3. Tax 26. 20 applies only to:
 - (a) Slag, ash and residues of a kind used in industry either for the extraction of metals or as a basis for the manufacture of chemical compounds of metals, excluding ash and residues from the incineration of municipal waste (Tax 26. 21);
 - (b) Slag, ash and residues containing arsenic, whether or not containing metals, of a kind used either for the extraction of arsenic or metals or for the manufacture of their chemical compounds.

Tax Notes:

1. For the purposes of Tax 2620. 21, "leaded gasoline sludges and leaded anti-knock compound sludges" mean sludges obtained from storage tanks of leaded gasoline and leaded anti-knock compounds (for example, tetraethyl lead), and consisting essentially of lead, lead compounds and iron oxide.
2. Slag ash and residues containing arsenic, mercury, thallium or their mixtures, of a kind used for the extraction of arsenic or those metals or for the manufacture of their chemical compounds, are to be classified in Tax 2620. 60.

Chapter 27

Mineral fuels, mineral oils and products of their distillation; bituminous substances; mineral waxes

Notes:

1. This Chapter does not cover:
 - (a) Separate chemically defined organic compounds, other than pure methane and propane which are to be classified in Tax 27.11;
 - (b) Medicaments of Tax 30.03 or 30.04; or
 - (c) Mixed unsaturated hydrocarbons of Tax 33.01, 33.02 or 38.05.
2. References in Tax 27.10 to "petroleum oils and oils obtained from bituminous minerals" include not only petroleum oils and oils obtained from bituminous minerals but also similar oils, as well as those consisting mainly of mixed unsaturated hydrocarbons, obtained by any process, provided that the weight of the non-aromatic constituents exceeds that of the aromatic constituents. However, the references do not include liquid synthetic polyolefins of which less than 60% by volume distills at 300°C, after conversion to 1,013 millibars when a reduced-pressure distillation method is used (Chapter 39).
3. For the purposes of Tax 27.10, "waste oils" means waste containing mainly petroleum oils and oils obtained from bituminous minerals (as described in Note 2 to this Chapter), whether or not mixed with water. These include:
 - (a) Such oils no longer fit for use as primary products (for example, used lubricating oils, used hydraulic oils and used transformer oils);
 - (b) Sludge oils from the storage tanks of petroleum oils, mainly containing such oils and a high concentration of additives (for example, chemicals) used in the manufacture of the primary products; and
 - (c) Such oils in the form of emulsions in water or mixtures with water, such as those resulting from oil spills or storage tank washings, or from the use of cutting oils for machining operations.

Tax Notes:

1. For the purposes of Tax 2701.11, "anthracite" means coal having a volatile matter limit (on a dry, mineral - matter - free basis) not exceeding 14%.
2. For the purposes of Tax 2701.12, "bituminous coal" means coal having a volatile matter limit (on a dry, mineral-matter-free basis) exceeding 14% and a calorific value limit (on a moist, mineral-matter-free basis) equal to or greater than 5,833 kcal/kg.
3. For the purposes of Tax 2707.10, 2707.20, 2707.30 and 2707.40, the terms "crude benzene", "crude cresylic acid", "crude xylene" and "naphthalene" apply to products which contain more than 50% by weight of benzene, cresylic acid, xylene, or naphthalene, respectively.
4. For the purposes of Tax 2710.12, "light oils and products" are those of which according to ISO 3405 method (ASTMD 86 method to identify), 90% or more by volume (including losses) distil at 210°C.
5. For the purposes of the Tax of Tax 27.10, the term "biodiesel" means mono-alkyl esters of fatty acids of a kind used as a fuel, derived from animal or vegetable fats and oils whether or not used

Notes:

1.
 - (a) Goods (other than radioactive ores) answering to a description in Tax 28. 44 or 28. 45 are to be classified in those Tax and in no other Tax of the Nomenclature.
 - (b) Subject to paragraph (a) above, goods answering to a description in Tax 28.43, 28. 46 or 28. 52 are to be classified in those Tax and in no other Tax of this Section.
2. Subject to Note 1 above, goods classifiable in Tax 30.04, 30. 05, 30. 06, 32. 12, 33. 03, 33. 04, 33. 05, 33. 06, 33. 07, 35. 06, 37.07, or 38. 08 by reason of being put up in measured doses or for retail sale are to be classified in those Tax and in no other Tax of the Nomenclature.
3. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this Section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the Tax appropriate to that product, provided that the constituents are:
 - (a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
 - (b) presented together; and
 - (c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.

Chapter 28

Inorganic chemicals; organic or inorganic compounds of precious metals, of rare-earth metals of radioactive elements or of isotopes

Note:

1. Except where the context otherwise requires, the Tax of this Chapter apply only to:
 - (a) Separate chemical elements and separate chemically defined compounds, whether or not containing impurities;
 - (b) The products mentioned in (a) above dissolved in water;
 - (c) The products mentioned in (a) above dissolved in other solvents, provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport, and that the solvent does not render the product particularly suitable for specific use rather than for general use;
 - (d) The products mentioned in (a), (b) or (c) above with an added stabilizer (including an anti-caking agent) necessary for their preservation or transport;
 - (e) The products mentioned in (a), (b), (c) or (d) above with an added anti-dusting agent or a coloring substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use rather than for general use.
2. In addition to dithionites and sulphonylates stabilized with organic substances (Tax 28. 31), carbonates and percarbonate of inorganic bases (Tax 28.36), cyanides, cyanide oxides and complex cyanides of inorganic bases (Tax 28. 37), fulminates, cyanates and thiocyanates, of inorganic bases (Tax 28.42), organic products included in Tax 28. 43 to 28. 46 and 28. 52 and carbides (Tax 28. 49), only the following compounds of carbon are to be classified in this Chapter:
 - (a) Oxides of carbon, hydrogen cyanide and fulminic, isocyanic, thiocyanate and other simple or complex cyanogen acids (Tax 28. 11);

 - (a) Sodium chloride or magnesium oxide, whether or not pure, or other products of Section V;
 - (b) Organo-inorganic compounds other than those mentioned in Note 2 above;
 - (c) Products mentioned in Note 2, 3, 4 or 5 to Chapter 31;
 - (d) Inorganic products of a kind used as luminophores, of Tax 32. 06; glass frit and other glass in the form of powder, granules of flakes, of Tax 32. 07;
 - (e) Artificial graphite (Tax 38. 01); products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades, of Tax 38. 13; ink removers put up in packings for retail sale, of Tax 38.24, cultured crystals (other than optical elements) weighing not less than 2.5g each, of the halides of the alkali or alkaline-earth metals, of Tax 38. 24;
 - (f) Precious or semi-precious stones (natural, synthetic or reconstructed) or dust or powder of such stones (Tax 71.02 to 71. 05), or precious metals or precious metal alloys of Chapter 71;
 - (g) The metals, whether or not pure, metal alloys or ceramic metals, including sintered metal carbides (metal carbides sintered with a metal), of Section XV; or
 - (h) Optical elements, for example, of the halides of the alkali or alkaline-earth metals (Tax 90. 01).
4. Chemically defined complex acids consisting of a nonmetal acid of sub- Chapter IV and a metal acid of sub-Chapter II are to be

classified in Tax 28. 11.

5. Tax 28. 26 to 28.42 apply only to metal or ammonium salts or per-salts. Except where the context otherwise requires, double or complex salts are to be classified in Tax 28. 42.

6. Tax 28. 44 applies only to:

(a) Technetium (atomic No. 43), promethium (atomic No. 61), polonium (atomic No. 84) and all elements with an atomic number greater than 84;

(b) Natural or artificial radioactive isotopes (including those of the precious metals or of the base metals of Sections XIV and XV), whether or not mixed together;

(c) Compounds, inorganic or organic, of these elements or isotopes, whether or not chemically defined, whether or not mixed together;

(d) Alloys, dispersions (including ceramic metals), ceramic products and mixtures containing these elements or isotopes or inorganic or organic compounds thereof and having a specific radioactivity exceeding 74 Bq/g (0.002 microcurie/g);

(e) Spent (irradiated) fuel elements (cartridges) of nuclear reactors;

(f) Radioactive residues whether or not usable.

The term "isotopes", for the purposes of this Note and of the wording of Tax 28. 44 and 28. 45, refers to:

(i) individual nuclides, excluding, however, those existing in nature in the monoisotopic state;

(ii) mixtures of isotopes of one and the same element, enriched in one or several of the said isotopes, that is, elements of which the natural isotopic composition has been artificially modified.

7. Tax 28. 53 includes copper phosphide (phosphor copper) containing more than 15% by weight of phosphorus.

8. Chemical elements (for example, silicon and selenium) doped for use in electronics are to be classified in this Chapter, provided that they are in forms unworked as drawn, or in the form of cylinders or rods. When cut in the form of discs, wafers or similar forms, they fall in Tax 38.18.

Tax Note:

For the purposes of Tax 2852. 10, the expression "chemically defined" means all organic or inorganic compounds of mercury meeting the requirements of paragraphs(a) to (e) of Note 1 to Chapter 28 or paragraphs (a) to (h) of Note 1 to Chapter 29

Chapter 29

Organic chemicals

Notes:

- Except where the context otherwise requires, the Tax of this Chapter apply only to:
 - Separate chemically defined organic compounds, whether or not containing impurities;
 - Mixtures of two or more isomers of the same organic compound (whether or not containing impurities), except mixtures of acyclic hydrocarbon isomers (other than stereoisomers), whether or not saturated (Chapter 27);
 - The products of Tax 29.36 to 29.39 or the sugar ethers, sugar acetals and sugar esters, and their salts, of Tax 29.40, or the products of Tax 29.41, whether or not chemically defined;
 - The products mentioned in (a), (b) or (c) above dissolved in water;
 - The products mentioned in (a), (b) or (c) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for specific use rather than for general use;
 - The products mentioned in (a), (b), (c), (d) or (e) above with an added stabilizer (including an anti-caking agent) necessary for their preservation or transport;
 - The products mentioned in (a), (b), (c), (d), (e) or (f) above with an added anti-dusting agent or a coloring or odoriferous substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use rather than for general use;
 - The following products, diluted to standard strengths, for the production of azo dyes: diazonium salts, couplers used for these salts and diazo diazotizing amines and their salts.
- This Chapter does not cover:
 - Goods of Tax 15.04 or crude glycerol of Tax 15. 20;
 - Ethyl alcohol (Tax 22. 07 or 22. 08);
 - Methane or propane (Tax 27. 11);
 - The compounds of carbon mentioned in Note 2 to Chapter 28;
 - Immunological products of Tax 30. 02
 - Urea (Tax 31. 02 or 31.05);
 - Coloring matter of vegetable or animal origin (Tax 32.03), synthetic organic coloring matter, synthetic organic products of a kind used as fluorescent brightening agents or as luminophores (Tax 32.04) or dyes or other coloring matter put up in forms or packings for retail sale (Tax 32.12);
 - Enzymes (Tax 35.07);
 - Polyacetaldehyde, hexamethylenetetramine or similar substances, put up in forms (for example, tablets, sticks or similar forms) for use as fuels, or liquid or liquefied-gas fuels in containers of a kind used for filling or refilling cigarette or similar lighters and of a capacity not exceeding 300cm³ (Tax 36.06);
 - Products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades, of Tax 38.13; ink removers put up in packings for retail sale, of Tax 38. 24; or
 - Optical elements, for example, of ethylenediamine tartrate (Tax 90.01)
- Goods which could be included in two or more of the Tax of this Chapter are to be classified in that one of those Tax which occurs last in numerical order.
- In Tax 29.04 to 29.06, 29. 08 to 29.11 and 29.13 to 29.20, any reference to halogenated, sulfonated, nitrated or nitrosated derivatives includes a reference to compound derivatives, such as halosulfonated, nitrohalogenated, nitrosulphonated or nitrosulphohalogenated derivatives.

Nitro or nitroso groups are not to be taken a “nitrogen-functions” for the purpose of Tax 29. 29.

For the purposes of Tax 29.11, 29.12, 29.14, 29.18 and 29.22, “ oxygen-function” is to be restricted to the functions (the characteristic organic oxygen-containing groups) referred to in Tax 29.05 to 29.20.
- The esters of acid-function organic compounds of sub-Chapters I to VII with organic compounds of these sub-Chapters are to be classified with that compound which is classified in the Tax which occurs last in numerical order in these sub-Chapters.
 - Esters of ethyl alcohol with acid-function organic compounds of sub- Chapters I to VII are to be classified in the same Tax as the corresponding acid-function compounds.
 - Subject to Note 1 to Section VI and Note 2 to Chapter 28:
 - Inorganic salts of organic compounds such as acid, phenol or enol -function compounds or organic bases, of sub-Chapters I to X or Tax 29.42, are to be classified in the Tax appropriate to the organic compound;
 - Salts formed between organic compounds of Chapters I to X or Tax 29. 42 are to be classified in the Tax appropriate to the base or to the acid (including phenol or enol-function compounds) from which they are formed, whichever occurs last in numerical order in the Chapter;
 - Coordination compounds, other than products classifiable in Chapter XI or Tax 29.41, are to be classified in the Tax which occurs last in numerical order in chapter 29, among those appropriate to the fragments formed by “cleaving” of all metal bonds, other than metal carbon bonds.
 - Metal alcoholates are to be classified in the same Tax as the corresponding alcohols except in the case of ethanol (Tax 29. 05).
 - Halides of carboxylic acids are to be classified in the same Tax as the corresponding acids.

6. The compounds of Tax 29. 30 and 29. 31 are organic compounds the molecules of which contain, in addition to atoms of hydrogen, oxygen or nitrogen, atoms of other non-metals or of metals (such as sulphur, arsenic or lead) directly linked to carbon atoms.

Tax 29. 30 (organo-sulphur compounds) and Tax 29.31 (other organo-inorganic compounds) do not include sulphonated or halogenated derivatives (including compound derivatives) which, a- part from hydrogen, oxygen and nitrogen, only have directly linked to carbon the atoms of sulphur or of a halogen which give them their nature of sulphonated or halogenated derivatives (or compound derivatives).

7. Tax 29. 32, 29. 33 and 29. 34 do not include epoxides with a three-membered ring, ketone peroxides, cyclic polymers of aldehydes or of thioaldehydes, anhydrides of polybasic carboxylic acids, cyclic esters of polyhydric alcohols or phenols with polybasic acids, or imides of polybasic acids.

These provisions apply only when the ring-position hetero-atoms are those resulting solely from the cyclizing function or functions here listed.

8. For the purposes of Tax 29. 37 :

(a) the term "hormones" includes hormone-releasing or hormone-stimulating factors, hormone inhibitors and hormone antagonists(anti-hormones);

(b) the expression "used primarily as hormones" applies not only to hormone derivatives and structural analogues used primarily for their hormonal effect, but also to those derivatives and structural analogues used primarily as intermediates in the synthesis of products of this Tax.

Tax Notes:

1. Within any one Tax of this Chapter, derivatives of a chemical compound (or group of chemical compounds) are to be classified in the same Tax as that compound (or group of compounds) provided that they are not more specifically covered by any other Tax and that there is no residual Tax named "other" in the series of Tax concerned.

2. Note 3 of Chapter 29 does not apply to the Tax of this Chapter.

3. Tax 32. 03, 32. 04, 32. 05 and 32. 06 apply also to products based on coloring matter (including, in the case of Tax 32. 06, coloring pigments of Tax 25. 30 or Chapter 28, metal flakes and metal powders), of a kind used for coloring any material or used as ingredients in the manufacture of coloring products. The Tax do not apply, however, to pigments dispersed in nonaqueous media, in liquid or paste form, of a kind used in the manufacture of paints, including enamels (Tax 32.12), or to other products of Tax 32. 07, 32. 08, 32. 09, 32. 10, 32. 12, 32. 13 or 32. 15.

4. Tax 32. 08 includes solutions (other than collodions) consisting of any of the products specified in Tax 39. 01 to 39. 13 in volatile organic solvents when the weight of the solvent exceeds 50% of the weight of the solution.

5. The expression "coloring matter" in this Chapter does not include products of a kind used as extenders in oil paints, whether or not they are also suitable for coloring distempers.

6. The expression " stamping foils" in Tax 32. 12 applies only to thin sheets of a kind used for printing, for example, book covers or hat bands, and consisting of:

Chapter 38

Miscellaneous chemical products

Notes:

1. This Chapter does not cover:
 - (a) Separate chemically defined elements or compounds with the exception of the following:
 - (i) Artificial graphite (Tax 38. 01);
 - (ii) Insecticides, rodenticides, fungicides, herbicides, anti-sprouting products and plant-growth regulators, disinfectants and similar products, put up as described in Tax 38. 08;
 - (iii) Products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades (Tax 38. 13);
 - (iv) Certified reference materials specified in Note 2 below;
 - (v) Products specified in Note 3(a) or 3(c) below.
 - (b) Mixtures of chemicals with foodstuffs or other substances with nutritive value, of a kind used in the products of human foodstuffs (generally Tax 21. 06).
 - (c) Slag, ash and residues (including sludges, other than sewage sludge), containing metals, arsenic or their mixtures and meeting the requirements of Note 3 (a) or (b) to Chapter 26 (Tax 26. 20).
 - (d) Medicaments (Tax 30. 03 or 30. 04). or
 - (e) Spent catalysts of a kind used for the extraction of base metals or for the manufacture of chemical compounds of base metals (Tax 26. 20), spent catalysts of a kind used principally for the recovery of precious metal (Tax 71. 12) or catalysts consisting of metals or metal alloys in the form of, for example, finely divided powder or woven gauze (Section XIV or XV).
2. (a) For the purpose of Tax 38. 22, the expression “certified reference materials” means reference materials which are accompanied by a certificate which indicates the values of the certified properties, the methods used to determine these values and the degree of certainty associated with each value and which are suitable for analytical, calibrating or referencing purposes.
 - (b) With the exception of the products of Chapter 28 or 29, for the classification of certified reference materials, Tax 38. 22 shall take precedence over any other Tax in the Nomenclature.
3. Tax 38. 24 includes the following goods which are not to be classified in any other Tax of the Nomenclature:
 - (a) Cultured crystals (other than optical elements) weighing not less than 2. 5 g each, of magnesium oxide or of the halides of the alkali or alkaline-earth metals;
 - (b) Fusel oil; Dippel's oil;
 - (c) Ink removers put up in packings for retail sale;
 - (d) Stencil correctors, other correcting fluids and correction tape, put up in packings for retail sale (other than those of Tax 96. 12);
 - (e) Ceramic firing testers, fusible (for example, Seger cones).
4. Throughout the Nomenclature, “municipal waste” means waste of a kind collected from households, hotels, restaurants, hospitals, shops, offices, etc., road and pavement sweepings, as well as construction and demolition waste. Municipal waste generally contains a large variety of materials such as plastics, rubber, wood, paper, textiles, glass, metals, food materials, broken furniture and other damaged or discarded products. The term “municipal waste”, however, does not cover:
 - (a) Individual materials or products segregated from the waste, such as wastes of plastics, rubber, wood, paper, textiles, glass or metals and spent batteries which fall in their appropriate Tax of the Nomenclature;
 - (b) Industrial waste;
 - (c) Waste pharmaceuticals, as defined in Note 4(k) to Chapter 30; or
 - (d) Clinical waste, as defined in Note 6 (a) below.
5. For the purposes of Tax 38. 25, “sewage sludge” means sludge arising from urban effluent treatment plant and includes pretreatment waste, scourings and un-stabilized sludge. Stabilized sludge when suitable for use as fertilizer is excluded (Chapter 31).
6. For the purposes of Tax 38. 25, the expression “other wastes” applies to:
 - (a) Clinical waste, that is, contaminated waste arising from medical research, diagnosis, treatment or other medical, surgical, dental or veterinary procedures, which often contain pathogens and pharmaceutical substances and require special disposal procedures (for example, soiled dressings, used gloves and used syringes);
 - (b) Waste organic solvents;
 - (c) Wastes of metal pickling liquors, hydraulic fluids, brake fluids and anti-freezing fluids; and
 - (d) Other wastes from chemical or allied industries.The expression “other wastes” does not, however, cover wastes which contain mainly petroleum oils or oils obtained from bituminous minerals (Tax 27. 10).
7. For the purposes of Tax 38. 26, the term “biodiesel” means mono-alkyl esters of fatty acids of a kind used as a fuel, derived from animal or vegetable fats and oils whether or not used

SECTION VII

PLASTICS AND PRODUCTS THEREOF; RUBBER AND PRODUCTS THEREOF

Notes:

1. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this Section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the Tax appropriate to that product, provided that the constituents are:

(a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;

(b) presented together;

(c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.

2. Except for the goods of Tax 39. 18 or 39. 19, plastics, rubber, and products thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in Chapter 49.

Chapter 39

Plastics and products thereof

Notes:

1. Throughout the Nomenclature the expression "plastics" means those materials of Tax 39. 01 to 39. 14 which are or have been capable, either at the moment of polymerization or at some subsequent stage, of being formed under external influence (usually heat and pressure, if necessary with a solvent or plasticizer) by molding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence.

Throughout the Nomenclature any reference to "plastics" also includes vulcanized fiber. The expression, however, does not apply to materials regarded as textile materials of Section XI.

2. This Chapter does not cover:

(a) Lubricating products of Tax 27. 10 or 34. 03.

(b) Waxes of Tax 27. 12 or 34. 04;

(c) Separate chemically defined organic compounds (Chapter 29);

(d) Heparin or its salts (Tax 30. 01);

(e) Solutions (other than collodions) consisting of any of the products specified in Tax 39. 01 to 39. 13 in volatile organic solvents when the weight of the solvent exceeds 50% of the weight of the solution (Tax 32. 08); stamping foils of Tax 32. 12;

(f) Organic surface-active agents or products of Tax 34. 02;

(g) Run gums or ester gums (Tax 38. 06);

(h) Prepared additives for mineral oils (including gasoline) or for other liquids used for the same purposes as mineral oils (Tax 38. 11)

(i) Prepared hydraulic fluids based on polyglycols silanes or other polymers of chapter 39 (Tax 38. 19);

(j) Diagnostic or laboratory reagents on a backing of plastics (Tax 38. 22);

(k) Synthetic rubber, as defined for the purposes of Chapter 40, or products thereof;

(l) Saddlery or harness (Tax 42. 0) or trunks, suitcases, handbags or other containers of Tax 42. 02;

(m) Plaits, wickerwork or other products of Chapter 46;

(n) Wall coverings of Tax 48. 14;

(o) Goods of Section XI (textiles and textile products);

(p) Products of Section XII (for example, footwear, headgear, umbrellas, sun umbrellas, walking-sticks, w, hips, riding-crops or parts thereof);

(q) Imitation jewelry of Tax 71. 17;

(r) Products of Section XVI (machines and mechanical or electrical appliances);

(s) Parts of aircraft or vehicles of Section XVII;

(t) Products of Chapter 90 (for example, optical elements, spectacle frames, drawing instruments);

(u) Products of Chapter 91 (for example, clock or watch cases);

(v) Products of Chapter 92 (for example, musical instruments or parts thereof);

(w) Products of Chapter 94 (for example, furniture, lamps and lighting fittings, illuminated signs, prefabricated buildings);

(x) Products of Chapter 95 (for example, toys, games, sports requisites); or

(y) Products of Chapter 96 (for example, brushes, buttons, slide fasteners, combs, mouthpieces or stems for smoking pipes, cigarette holders or the like, parts of vacuum flasks or the like, pens, propelling pencils unipod, bipod, tripod or the like).

3. Tax 39.01 to 39.11 apply only to goods of a kind produced by chemical synthesis, falling in the following categories:

(a) Liquid synthetic polyolefins of which less than 60% by volume distils at 300 °C, after conversion to 1, 013 millibars when a reduced-

pressure distillation method is used (Tax 39. 01 and 39. 02);

- (b) Resins, not highly polymerized, of the coumarone-indene type (Tax 39. 11);
- (c) Other synthetic polymers with an average of at least 5 monomer units;
- (d) Silicones (Tax 39. 10);
- (e) Resoles (Tax 39. 09) and other prepolymers.

4. The expression “copolymers” covers all polymers in which no single monomer unit contributes 95% or more by weight to the total polymer content.

For the purposes of this Chapter, except where the context otherwise requires, copolymers (including copolycondensates, co-polyaddition products, block copolymers and graft copolymers) and polymer blends are to be classified in the Tax covering polymers of that comonomer unit which predominates by weight over every other single comonomer unit. For the purposes of this Note, constituent comonomer units of polymers falling in the same Tax shall be taken together.

If no single comonomer unit predominates, copolymers or polymer blends, as the case may be, are to be classified in the Tax which occurs last in numerical order among those which equally merit consideration.

5. Chemically modified polymers, that is those in which only appendages to the main polymer chain have been changed by chemical reaction, are to be classified in the Tax appropriate to the unmodified polymer. This provision does not apply to graft copolymers.

6. In Tax 39. 01 to 39. 14, the expression “ primary forms” applies only to the following forms:

- (a) Liquids and pastes, including dispersions (emulsions and suspensions) and solutions;
- (b) Blocks of irregular shape, lumps, powders (including molding powders), granules, flakes and similar bulk forms.

7. Tax 39. 15 does not apply to waste, parings and scrap of a single thermoplastic material, transformed into primary forms (Tax 39. 01 to 39. 14).

8. For the purposes of Tax 39. 17, the expression “tubes, pipes and hoses” means hollow products, whether semi-manufactures or finished products, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). This expression also includes sausage casings and other lay-flat tubing. However, except for the last-mentioned, those having an internal cross-section other than round, oval, rectangular (in which the length does not exceed 1. 5 times the width) or in the shape of a regular polygon are not to be regarded as tubes, pipes and hoses but as profile shapes.

9. For the purposes of Tax 39. 18, the expression “wall or ceiling coverings of plastics” applies to products in rolls, of a width not less than 45 cm, suitable for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the layer of plastics (on the face side) being grained, embossed, colored, design-printed or otherwise decorated.

10. In Tax 39. 20 and 39.21, the expression “ plates, sheets, film, foil and strip” applies only to plates, sheets, film, foil and strip (other than those of Chapter 54) and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but not further worked (even if when so cut they become products ready for use).

11. Tax 39. 25 applies only to the following products, not being products covered by any of the earlier Tax of sub-Chapter II:

- (a) Reservoirs, tanks (including septic tanks), vats and similar containers, of a capacity exceeding 300 L;
- (b) Structural elements used, for example, in floors, walls or partitions, ceilings or roofs;
- (c) Gutters and fittings therefor;
- (d) Doors, windows and their frames and thresholds for doors;
- (e) Balconies, balustrades, fencing, gates and similar barriers;
- (f) Shutters, blinds (including Venetian blinds) and similar products and parts and fittings thereof;
- (g) Large-scale shelving for assembly and permanent installation, for example, in shops, workshops, warehouses;
- (h) Ornamental architectural features, for example, flutings, cupolas, dovecotes; and
- (i) Fittings and mountings intended for permanent installation in or on doors, windows, staircases, walls or other parts of buildings, for example, knobs, handles, hooks, brackets, towel rails, switch-plates and other protective plates.

Tax Notes:

1. Within any one Tax of this Chapter, polymers (including copolymers) and chemically modified polymers are to be classified according to the following provisions:

(a) Where there is a Tax named “Other” in the same series:

(i)The designation in a Tax of a polymer by the prefix “poly” (for example, polyethylene and polyamide-6, 6) means that the constituent monomer unit or monomer units of the named polymer taken together must contribute 95% or more by weight of the total polymer content.

(ii) The copolymers named in Tax 3901. 30, 3901. 40, 3903.20, 3903. 30 and 3904. 30 are to be classified in those Tax, provided that the comonomer units of the named copolymers contribute 95% or more by weight of the total polymer content.

(iii) Chemically modified polymers are to be classified in the Tax named "Other", provided that the chemically modified polymers are not more specifically covered by another Tax.

(iv) Polymers not meeting (1), (2) or (3) above, are to be classified in the Tax, among the remaining Tax in the series, covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same Tax shall be taken together. Only the constituent comonomer units of the polymers in the series of Tax under consideration are to be compared.

2. Where there is no Tax named "Other" in the same series:

(i) Polymers are to be classified in the Tax covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same Tax shall be taken together. Only the constituent comonomer units of the polymers in the series under consideration are to be compared.

(ii) Chemically modified polymers are to be classified in the Tax appropriate to the unmodified polymer.

Polymer blends are to be classified in the same Tax as polymers of the same monomer units in the same proportions.

3. For the purposes of Tax 3920. 43, the term "plasticizers" includes "secondary plasticizers."

Chapter 40
Rubber and products thereof

Notes:

1. Except where the context otherwise requires, throughout the Nomenclature the expression “rubber” means the following products, whether or not vulcanized or hard: natural rubber, balata, gutta-percha, guayule, chicle and similar natural gums, synthetic rubber, factice derived from oils, and such substances reclaimed.
2. This Chapter does not cover:
 - (a) Goods of Section XI (textiles and textile products);
 - (b) Footwear or parts thereof of Chapter 64;
 - (c) Headgear or parts thereof (including bathing caps) of Chapter 65;
 - (d) Mechanical or electrical appliances or parts thereof of Section XM (including electrical goods of all kinds), of hard rubber;
 - (e) Products of Chapter 90, 92, 94 or 96;
 - (f) Products of Chapter 95 (other than sports gloves, mittens and mitts and products of Tax 40. 11 to 40. 13).
3. In Tax 40. 01 to 40.03 and 40.05, the expression “ primary forms” applies only to the following forms:
 - (a) Liquids and pastes (including latex, whether or not pre-vulcanized, and other dispersions and solutions);
 - (b) Blocks of irregular shape, lumps, bales, powders, granules, crumbs and similar bulk forms.
4. In Note I to this Chapter and in Tax 40. 02, the expression “synthetic rubber” applies to:
 - (a) Unsaturated synthetic substances which can be irreversibly transformed by vulcanization with sulphur into non-thermoplastic substances which, at a temperature between 18°C and 29°C, will not break on being extended to three times their original length and will return, after being extended to twice their original length, within a period of five minutes, to a length not greater than one and a half times their original length. For the purposes of this test, substances necessary for the cross-linking, such as vulcanizing activators or accelerators, may be added; the presence of substances as provided for by Note 5 (b) (ii) and (iii) is also permitted. However, the presence of any substances not necessary for the cross-linking, such as extenders, plasticizers and fillers, is not permitted;
 - (b) TM; and
 - (c) Natural rubber modified by grafting or mixing with plastics, depolymerized natural rubber, mixtures of unsaturated synthetic substances with saturated synthetic high polymers provided that all the above-mentioned products comply with the requirements concerning vulcanization, elongation and recovery in (a) above.
 5. (a) Tax 40. 01 and 40. 02 do not apply to any rubber or mixture of rubbers which has been compounded, before or after coagulation, with:
 - (i) vulcanizing agents, accelerators, retarders or activators (other than those added for the preparation of pre-vulcanized rubber latex);
 - (ii) pigments or other coloring matter, other than those added solely for the purpose of identification;
 - (iii) plasticizers or extenders (except mineral oil in the case of oil- extended rubber), fillers, reinforcing agents, organic solvents or any other substances, except those permitted under (b);
 - (b) The presence of the following substances in any rubber or mixture of rubbers shall not affect its classification in Tax 40. 01 or 40. 02, as the case may be, provided that such rubber or mixture of rubbers retains its essential character as a raw material:
 - (i) emulsifiers or anti-tack agents;
 - (ii) small amounts of breakdown products of emulsifiers;
 - (iii) very small amounts of the following: heat-sensitive agents (generally for obtaining thermosensitive rubber latexes), cationic surface-active agents (generally for obtaining electro-positive rubber latexes), antioxidants, coagulants, crumbling agents, freeze-resisting agents, peptizers, preservatives, stabilizers, viscosity-control agents, or similar special-purpose additives.
6. For the purposes of Tax 40. 04, the expression “waste, parings and scrap” means rubber waste, parings and scrap from the manufacture or working of rubber and rubber goods definitely not usable as such because of cutting-up, wear or other reasons.
7. Thread wholly of vulcanized rubber, of which any cross-sectional dimension exceeds 5 mm, is to be classified as strip, rods or profile shapes, of Tax 40. 08.
8. Tax 40. 10 includes conveyor or transmission belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber.
9. In Tax 40. 01, 40. 02 , 40. 03 , 40. 05, and 40. 08, the expressions “plates” , “sheets” and “strip” apply only to plates, sheets and strip and to blocks of regular geometric shape, uncut or simply cut to rectangular (including square) shape, whether or not having the character of products and whether or not printed or otherwise surface-worked, but not otherwise cut to shape or further worked.
- In Tax 40. 08 the expressions “rods” and “profile shapes” apply only to such products, whether or not cut to length or surface-worked but not otherwise worked.

Subject to the provisions of Note 7, Tax 48. 01 to 48. 05 include paper and paperboard which have been subjected to calendaring, super-calendaring, glazing or similar finishing, false watermarking or surface sizing, and also paper, paperboard, cellulose wadding and webs of cellulose fibers, colored or marbled throughout the mass by any method. Except where Tax 48. 03 otherwise requires, these Tax do not apply to paper, paperboard, cellulose wadding or webs of cellulose fibers which have been otherwise processed.
 4. In this Chapter the expression “newsprint” means uncoated paper of a kind used for the printing of newspapers, of which not less than 50% by weight of the total fiber content consists of wood fibers obtained by a mechanical or chemi-mechanical process, unsized or very lightly sized, having a surface roughness Parker Print Surf (1 MPa) on each side exceeding 2.5 micrometers (microns), weighing not less than 40 g/m² and not more than 65 g/m², apply only to paper:

 - (c) having a brightness of less than 60%, a caliper of 254 micrometers (microns) or less and an ash content of more than 8%.
Tax 48. 02 does not, however, cover filter paper and paperboard (including tea-bag paper) or felt paper or paperboard.
 6. In this Chapter “kraft paper and paperboard” means paper and paper-board of which not less than 80% by weight of the total fiber content consists of fibers obtained by the chemical sulphate or soda processes.
 7. Except where the terms of the Tax otherwise require, paper, paper-board, cellulose wadding and webs of cellulose fibers answering to a description in two or more of the Tax 48. 01 to 48. 11 are to be classified under that one of such Tax which occurs last in numerical order in the Nomenclature.
 8. Tax 48.03 to 48.09 apply to paper, paperboard, cellulose wadding and webs of cellulose fibers:
 - (a) in strips or rolls of a width exceeding 36 cm;
 - (b) in rectangular (including square) sheets with one side exceeding 36 cm and the other side exceeding 15 cm in the unfolded state.

5. For the purposes of Tax 52. 04, 54. 01 and 55. 08 the expression “sewing thread” means multiple (folded) or cabled yarn:

(a) Put up on supports (for example, reels, tubes) of a weight (including support) not exceeding 1,000g;

(b) Dressed for use as sewing thread;

(c) With a final “Z” twist.

6. For the purposes of this Section, the expression “high tenacity yarn” means yarn having a tenacity, expressed in cn/tex (centinewton per tex), greater than the following:

Single yarn of nylon or other polyamides, or of polyesters 60 cn/tex

Multiple (folded) or cabled yarn of nylon or other polyamides, or of polyesters 53 cn/tex

Single, multiple (folded) or cabled yarn of viscose rayon 27 cn/tex

7. For the purposes of this Section, the expression “made up” means:

(a) Cut otherwise than into squares or rectangles;

(b) Produced in the finished state, ready for use (or merely needing separation by cutting dividing threads) without sewing or other working (for example, certain dusters, towels, table cloths, scarf squares, blankets);

(c) Cut to size and with at least one heat-sealed edge with a visibly tapered or compressed border and the other edges treated as described in any other subparagraph of this Note, but excluding fabrics the cut edges of which have been prevented from unravelling by hot cutting or by other simple means;

(d) Hemmed or with rolled edges, or with a knotted fringe at any of the edges, but excluding fabrics the cut edges of which have been prevented from unravelling by whipping or by other simple means;

(e) Cut to size and having undergone a process of drawn thread work;

(f) Assembled by sewing, gumming or otherwise (other than piece goods consisting of two or more lengths of identical material joined end to end and piece goods composed of two or more textiles assembled in layers, whether or not padded);

(g) Knitted or crocheted Lo shape, whether presented as separate items or in the form of a number of items in the length.

8. For the purposes of Chapters 50 to 60:

(a) Chapters 50 to 55 and 60 and, except where the context otherwise requires, Chapters 56 to 59 do not apply to goods made up within the meaning of Note 7 above; and

(b) Chapters 50 to 55 and 60 do not apply to goods of Chapters 56 to 59.

9. The woven fabrics of Chapters 50 to 55 include fabrics consisting of layers of parallel textile yarns superimposed on each other at acute or right angles. These layers are bonded at the intersections of the yarns by an adhesive or by thermal bonding.

10. Elastic products consisting of textile materials combined with rubber threads are classified in this Section.

11. For the purposes of this Section, the expression “impregnated” includes “dipped”.

12. For the purposes of this Section, the expression “polyamides” includes “aramid”.

13. For the purposes of this section and where applicable throughout the nomenclature, the expression “elastomeric yarn” means Filament yarn, including monofilament, of synthetic textile material, other than textured yarn, which does not break on being extended to three times its original length and which returns, after being extended to twice its original length, within a period of five minutes, to a length not greater than one and a half times its original length.

14. Unless the context otherwise requires, textile garments of different Tax are to be classified in their own Tax even if put up in sets for retail sale. For the purposes of this Note, the expression “textile garments” means garments of Tax 61. 01 to 61. 14 and Tax 62. 01 to 62. 11.

Tax Notes:

1. In the Section and, where applicable, throughout the Nomenclature, the following expressions have the meanings hereby assigned to them:

(a) Unbleached yarn which:

(i) has the natural color of its constituent fibers and has not been bleached, dyed (whether or not in the mass) or printed;

(ii) is of indeterminate color (“grey yarn”), manufactured from garneted stock.

Such yarn may have been treated with a colorless dressing or fugitive dye (which disappears after simple washing with soap) and, in the case of man-made fibers, treated in the mass with delustering agent (for example, titanium dioxide).

(b) Bleached yarn Yarn which:

(i) has undergone a bleaching process, is made of bleached fibers or, unless the context otherwise requires, has been dyed white (whether or not in the mass) or treated with a white dressing;

(ii) consists of a mixture of unbleached and bleached fibers;

(iii) is multiple (folded) or cabled and consists of unbleached and bleached yarns.

(c) Colored (dyed or printed) yarn which:

(i) is dyed (whether or not in the mass) other than white or in a fugitive color, or printed, or made from dyed or printed fibers;

(ii) consists of a mixture of dyed fibers of different colors or of a mixture of unbleached or bleached fibers with colored fibers (marl or mixture yarns), or is printed in one or more colors at intervals to give the impression of dots;

(iii) is obtained from slivers or rovings which have been printed; or.

(iv) is multiple (folded) or cabled and consists of unbleached or bleached yarn and colored yarn.

The above definitions also apply to monofilament and to strip or the like of Chapter 54.

(d) Unbleached woven fabric

Woven fabric made from unbleached yarn and which has not been bleached, dyed or printed. Such fabric may have been treated with a colorless dressing or a fugitive dye.

(e) Bleached woven fabric which:

(i) has been bleached or, unless the context otherwise requires, dyed white or treated with a white dressing, in the piece;

(ii) consists of bleached yarn; or

(iii) consists of unbleached and bleached yarn.

(f) Dyed woven fabric which:

(i) is dyed a single uniform color other than white (unless the context otherwise requires) or has been treated with a colored finish other than white (unless the context otherwise requires), in the piece; or

(ii) consists of colored yarn of a single uniform color.

(g) Woven fabric of yarns of different colors

Woven fabric (other than printed woven fabric) which:

(i) consists of yarns of different colors or yarns of different shades of the same color (other than the natural color of the constituent fibers);

(ii) consists of unbleached or bleached yarn and colored yarn; or

(iii) consists of marl or mixture yarns. (In all cases, the yarn used in selvages and piece ends is not taken into consideration.)

(h) Printed woven fabric

Woven fabric which has been printed in the piece, whether or not made from yarns of different colors. (The following are also regarded as printed woven fabrics: woven fabrics bearing designs made, for example, with a brush or spray gun, by means of transfer paper, by flocking or by the batik process.)

The process of mercerization does not affect the classification of yarns or fabrics within the above categories.

The definitions at (d) to (h) above apply, *mutatis mutandis*, to knitted or crocheted fabrics.

(ii) Plain weave

A fabric construction in which each yarn of the weft passes alternately over and under successive yarns of the warp and each yarn of the warp passes alternately over and under successive yarns of the weft.

2.(a) Products of Chapters 56 to 63 containing two or more textile materials are to be regarded as consisting wholly of that textile material which would be selected under Note 2 to this Section for the classification of the product of Chapters 50 to 55 or of Tax 58. 09 consisting of the same textile materials.

(b) For the application of this rule:

(i) where appropriate, only the part which determines the classification under interpretative Rule 3 shall be taken into account;

(ii) in the case of textile products consisting of a ground fabric and a pile or looped surface, no account shall be taken of the ground fiber;

(iii) in the case of embroidery of Tax 58. 10 and goods thereof, only the ground fabric shall be taken into account. However, embroidery without visible ground, and goods thereof, shall be classified with reference to the embroidering threads alone.

① Quota rate: 1.

For a certain amount of cotton imported beyond the quota, the provisional tariff in the form of sliding tariff shall be applied. The specific ways are as follows:

1. When the paid price of imported cotton is higher than or equal to 15.000 yuan / kg, the specific tariff shall be calculated as 0.300 yuan / kg;

2. When the paid price of imported cotton is lower than 15.000 yuan / kg, the provisional ad valorem rate is calculated as follows: $R_i = 9.45 / P_i$

+ 2.6% × $P_i - 1$. The calculation result of the above formula shall be rounded to three decimal places. Where R_i is the provisional ad valorem rate, when the value calculated by the above formula is higher than 40%, R_i is 40%; P_i is the paid price with the unit: yuan / kg.

Chapter 54
Man-made filaments; strip and the like of man-made textile materials

Notes:
1. Throughout the Nomenclature, the term "man-made fibers" means staple fibers and filaments of organic polymers produced by manufacturing processes, either:
(a) By polymerization of organic monomers to produce polymers such as polyamides, polyesters, polyolefins or polyurethanes, or by chemical modification of polymers produced by this process (for example, poly (vinyl alcohol) prepared by the hydrolysis of poly (vinyl acetate));
(b) By dissolution or chemical treatment of natural organic polymers (for example, cellulose) to produce polymers such as cuprammonium rayon or viscose rayon, or by chemical modification of natural organic polymers (for example, cellulose, casein and other proteins, or alginic acid), to produce polymers such as cellulose acetate or alginates.
The terms "synthetic" and "artificial", used in relation to fibers, mean: synthetic: fibers as defined at(a); artificial: fibers as defined at (b). Strips and the like of Tax 50. 04 or 54. 05 are not considered to be man-made fibers.
The terms "man-made", "synthetic" and "artificial" shall have the same meanings when used in relation to "textile materials".
2. Tax 54. 02 and 54. 03 do not apply to synthetic or artificial filament tow of chapter 55.

Chapter 55
Man-made staple fibers

Notes:

Tax 55. 01 and 55. 02 apply only to man-made filament tow, consisting of parallel filament of a uniform length equal to the length of the tow, meeting the following specifications:

1. Length of tow exceeding 2 m;
2. Twist less than 5 turns per meter;
3. Measuring per filament less than 67 decitex;

4. Synthetic filament tow only: the tow must be drawn, that is to say, be incapable of being stretched by more than 100% of its length;

5. Total measurement of tow more than 20, 000 decitex.

Tow of a length not exceeding 2 m is to be classified in Tax 55.03 or 55.04.

Chapter 56

Wadding, felt and nonwovens; special yarns; twine, cordage, ropes and cables and products thereof

- Notes:**
1. This Chapter does not cover:
 - (a) Wadding, felt or nonwovens, impregnated, coated or covered with substances or products (for example, perfumes or cosmetics of Chapter 33, soaps or detergents of Tax 34.01, polishes, creams or similar products of Tax 34.05 fabric softeners of Tax 38. 09) where the textile material is present merely as a carrying medium;
 - (b) Textile products of Tax 58.11;
 - (c) Natural or artificial abrasive powder or grain, on a backing of felt or nonwovens (Tax 68. 05);
 - (d) Agglomerated or reconstituted mica, on a backing of felt or nonwovens (Tax 68.14);
 - (e) Metal foil on a backing of felt or nonwovens (Generally section XIV or section XV)
 - (f) Sanitary towels(pads) and tampons, napkins and napkin liners for babies and similar products of Tax 96.19.
 - 2.. The term “ felt” includes needle-loom felt and fabrics consisting of a web of textile fibers the cohesion of which has been enhanced by a stitch-bonding process using fibers from the web itself.
 3. Tax 56. 02 and 56. 03 cover respectively felt and nonwovens, impregnated, coated, covered or laminated with plastics or rubber whatever the nature of these materials (compact or cellular).
Tax 56. 03 also includes nonwovens in which plastics or rubber forms
Tax 56. 02 and 56. 03 do not, however, cover:
 - (a) Felt impregnated, coated, covered or laminated with plastics or rubber, containing 50% or less by weight of textile material or felt completely embedded in plastics or rubber (Chapter 39 or 40);
 - (b) Nonwovens, either completely embedded in plastics or rubber, or entirely coated or covered on both sides with such materials, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of color (Chapter 39 or 40) ; or
 - (c) Plates, sheets or strips of cellular plastics or cellular rubber combined with felt or nonwovens, where the textile material is present merely for reinforcing purposes (Chapter 39 or 40).
 4. Tax 56. 04 does not cover textile yarn, or strip or the like of Tax 54. 04 or 54.05, in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55); for the purpose of this provision, no account should be taken of any resulting change of color.

Chapter 59

Impregnated, coated, covered or laminated textile fabrics; textile products of a kind suitable for industrial use

Notes:

1. Except where the context otherwise requires, for the purposes of this Chapter the expression "textile fabrics" applies only to the woven fabrics of Chapters 50 to 55 and Tax 58.03 and 58.06, the braids and ornamental trimmings in the piece of Tax 58.08 and the knitted or crocheted fabrics of Tax 60.02 to 60.06.

2. Tax 59.03 applies to:

(a) Textile fabrics, impregnated, coated, covered or laminated with plastics, whatever the weight per square meter and whatever the nature of the plastic material (compact or cellular), other than:

(i) Fabrics in which the impregnation, coating, or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of color;

(ii) Products which cannot, without fracturing, be bent manually around a cylinder of a diameter of 7 mm, at a temperature between 15°C and 30°C (usually Chapter 39);

(iii) Products in which the textile fabric is either completely embedded in plastics or entirely coated or covered on both sides with such material, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of color (Chapter 39);

(iv) Fabrics partially coated or partially covered with plastics and bearing designs resulting from these treatments (usually Chapters 50 to 55, 58 or 60);

(v) Plates, sheets or strip of cellular plastics, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 39);

(vi) Textile products of Tax 58.11;

(b) Fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with plastics of Tax 56.04.

3. For the purposes of Tax 59.05, the expression "textile wall coverings" applies to products in rolls, of a width of not less than 45 cm, suitable for wall or ceiling decoration, consisting of a textile surface which has been fixed on a backing or has been treated on the back (impregnated or coated to permit pasting).

This Tax does not, however, apply to wall coverings consisting of textile flock or dust fixed directly on a backing of paper (Tax 48.14) or on a textile backing (generally Tax 59.07).

4. For the purposes of Tax 59.06, the expression "rubberized textile fabrics" means:

(a) Textile fabrics impregnated, coated, covered or laminated with rubber:

(i) Weighing not more than 1,500 g/m²; or

(ii) Weighing more than 1,500 g/m² and containing more than 50% by weight of textile materials

(b) Fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with rubber, of Tax 56.04; and

(c) Fabrics composed of parallel textile yarns agglomerated with rubber, irrespective of their weight per square meter

This Tax does not, however, apply to plates, sheets or strip of cellular rubber, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 40), or textile products of Tax 58.11.

5. Tax 59.07 does not apply to:

(a) Fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of color;

(b) Fabrics painted with designs (other than painted canvas being theatrical scenery, studio back-cloths or the like);

(c) Fabrics partially covered with flock, dust, powdered cork or the like and bearing designs resulting from these treatments; however, imitation pile fabrics remain classified in this Tax;

(d) Fabrics finished with normal dressings having a basis of amylaceous or similar substances;

(e) Wood veneered on a backing of textile fabrics (Tax 44.08);

(f) Natural or artificial abrasive powder or grain, on a backing of textile fabrics (Tax 68.05);

(g) Agglomerated or reconstituted mica, on a backing of textile fabrics (Tax 68.14); or

(h) Metal foil on a backing of textile fabrics (Generally section XIV or XV).

6. Tax 59.10 does not apply to:

(a) Transmission or conveyor belting, of textile material, of a thickness of less than 3 mm; or

(b) Transmission or conveyor belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber (Tax 40.10).

7. Tax 59.11 applies to the following goods, which cannot be classified in any Tax of Section XI:

(a) Textile products in the piece, cut to length or simply cut to rectangular (including square) shape (other than those having the character of the products of Tax 59.08 to 59.10), (Tax 40.10).

(i) Textile fabrics, felt and felt-lined woven fabrics, coated, covered or laminated with rubber, leather or other material, of a kind used for card clothing, and similar fabrics of a kind used for other technical purposes, including narrow fabrics made of velvet impregnated with rubber, for covering weaving spindles (weaving beams);

(ii) Bolting cloth;

(iii) Straining cloth of a kind used in oil presses or the like, of textile materials or of human hair;

(iv) Flat woven textile fabrics with multiple warp or weft, whether or not felted, impregnated or coated, of a kind used in machinery or for other technical purposes;

(v) Textile fabrics reinforced with metal, of a kind used for technical purposes;

(vi) Cords, braids and the like, whether or not coated, impregnated or reinforced with metal, of a kind used in industry as packing or lubricating materials;

(b) Textile products (other than those of Tax 59.08 to 59.10) of a kind used for technical purposes, for example, textile fabrics and felts, endless or fitted with linking devices, of a kind used in paper-making or similar machines (for example, for pulp or asbestos-cement), gaskets, washers, polishing discs and other machinery parts.

Chapter 61 Products of apparel and clothing accessories, knitted or crocheted

Notes:

1. This Chapter applies only to made up knitted or crocheted products.
2. This Chapter does not cover:
 - (a) Goods of Tax 62.12;
 - (b) Worn clothing or other worn products of Tax 63.09; or
 - (c) Orthopedic appliances, surgical belts, trusses or the like (Tax 90.21).
3. For the purposes of Tax 61.03 and 61.04:
 - (a) The term "suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising:

One suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waist coat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket, and

one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs.

All of the components of a suit must be of the same fabric construction, style, color and composition; they must also be of corresponding or compatible size. However, these components may have bindings of different fabric (the narrow fabric stitched to finish raw edges).

If several separate components to cover the lower part of the body are presented together (for example, trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers, or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

The term "suit" includes the following sets of garments, whether or not they fulfill all the above conditions:

 - (i) morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;
 - (ii) evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;
 - (iii) dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

(b) The term "ensemble" means a set of garments (other than suits and products of Tax 61.07, 61.08 or 61.09), composed of several pieces made up in identical fabric, put up for retail sale, and comprising:

One garment designed to cover the upper part of the body, with the exception of pullovers which may form a second upper garment in the sole context of twin sets, and of waistcoats which may also form a second upper garment, and

One or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, color and composition; they also must be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski suits, of Tax 61.12.
4. Tax 61.05 and 61.06 do not cover garments with pockets below the waist, with a ribbed waistband or other means of tightening at the bottom of the garment, or garments having an average of less than 10 stitches per linear centimeter in each direction counted on an area measuring at least 10cm x 10cm. Tax 61.05 does not cover sleeveless garments.
5. Tax 61.09 does not cover garments with a drawstring, a ribbed waistband or other means of tightening at the bottom of the garment.
6. For the purposes of Tax 61.11:
 - (a) The expression "babies' garments and clothing accessories" means products for young children of a body height not exceeding 86cm;
 - (b) Products which are, prima facie, classifiable both in Tax 61.11 and in other Tax of this Chapter are to be classified in Tax 61.11.
7. For the purposes of Tax 61.12, "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:
 - (a) a "ski overall", that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or foot-straps; or
 - (b) a "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:

-One garment such as an anorak, wind-cheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and-one pair of trousers whether

or not extending above waist-level, one pair of breeches or one bib and brace overall.

The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same color; they also must be of corresponding or compatible size.
8. Garments which are, prima facie, classifiable both in Tax 61.13 and in other Tax of this Chapter, excluding Tax 61.11, are to be classified in Tax 61.13.
9. Garments of this Chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes. Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the Tax covering women's or girls' garments.

Products of this Chapter may be made of metal thread.

Chapter 62
Products of apparel and clothing accessories, not knitted or crocheted

Notes:

1. This Chapter applies only to made up products of any textile fabric other than wadding, excluding knitted or crocheted products (other than those of Tax 62. 12).

2. This Chapter does not cover:

- (a) Worn clothing or other worn products of Tax 63. 09; or
- (b) Orthopaedic appliances, surgical belts, trusses or the like (Tax 90. 21).

3. For the purposes of Tax 62. 03 and 62. 04:

(a) The term "suit" means a set of garments composed of two or three pieces made up in respect of their outer surface, in identical fabric and comprising:

One suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer shell of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket, and

One garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs.

All of the components of a suit must be of the same fabric construction, color and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.

If several separate components to cover the lower part of the body are presented together (for example two pairs of trousers or, trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers, or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

The term "suit" includes the following sets of garments, whether or not they fulfil all the above conditions:

- (i) Morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;
- (ii) Evening dress (tailcoat), generally made of black cloth, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;
- (iii) Dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

(b) The term "ensemble" means a set of garments (other than suits and products of Tax 62. 07 or 62. 08) composed of several pieces made up in identical fabric, put up for retail sale, and comprising: One garment designed to cover the upper part of the body, with the exception of waistcoats which may also form a second upper garment, and one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, color and composition; they also must be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski suits, of Tax 62. 11.

4. For the purposes of Tax 62. 09:

- (a) The expression "babies' garments and clothing accessories" means clothes for young children of a body height not exceeding 86cm;
- (b) Products which are, *prima facie*, classifiable both in Tax 62.09 and in other Tax of this Chapter are to be classified in Tax 62. 09.

5. Garments which are, *prima facie*, classifiable both in Tax 62. 10 and in other Tax of this Chapter, excluding Tax 62. 09, are to be classified in Tax 62. 10.

6. For the purposes of Tax 62. 11, "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country skiing or alpine skiing)

They consist either of:

(a) A "ski overall", that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or foot-straps; or

(b) A "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:

One garment such as an anorak, wind-cheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and one pair of trousers whether or not extending above waist-level, one pair of breeches or one bib and brace overall.

The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same color; they also must be of corresponding or compatible size.

7. Scarves and products of the scarf type, square or approximately square, of which no side exceeds 60cm, are to be classified as handkerchiefs (Tax 62. 13). Handkerchiefs of which any side exceeds 60cm are to be classified in Tax 62. 14.

8. Garments of this Chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. these provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes. Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments to be classified in the Tax covering women's or girls' garments.

9. Products of this Chapter may be made of metal thread.

Chapter 70 Glass and glassware

Notes:

1. This Chapter does not cover:

- (a) Goods of Tax 32. 07 (for example, vitrifiable enamels and glazes, glass frit, other glass in the form of powder, granules or flakes);
- (b) Products of Chapter 71 (for example, imitation jewelry);
- (c) Optical fiber cables (Tax 85. 44), electrical insulators (Tax 85.46) or fitting of insulating material of Tax 85.47;
- (d) Optical fibers, optically worked optical elements, hypodermic syringes, artificial eyes, thermometers, barometers, hydrometers or other products of Chapter 90;
- (e) Lamps or lighting fittings, illuminated signs, illuminated nameplates or the like, having a permanently fixed light source, or parts thereof of Tax 94. 05;
- (f) Toys, games, sports requisites, Christmas tree ornaments or other products of Chapter 95 (excluding glass eyes without mechanisms for dolls or for other products of Chapter 95); or
- (g) Buttons, fitted vacuum flasks, scent or similar sprays or other products of Chapter 96.

2. For the purposes of Tax 70. 03, 70. 04 and 70. 05 :

- (a) glass is not regarded as “ worked” by reason of any process it has undergone before annealing;
- (b) cutting to shape does not affect the classification of glass in sheets;
- (c) the expression “absorbent, reflecting or non-reflecting layer” means a microscopically thin coating of metal or of a chemical compound (for example, metal oxide) which absorbs, for example, infra-red light or improves the reflecting qualities of the glass while still allowing it to retain a degree of transparency or translucency; or which prevents light from being reflected on the surface of the glass.

3. The products referred to in Tax 70. 06 remain classified in that Tax whether or not they have the character of products.

4. For the purposes of Tax 70. 19, the expression “ glass wool” means:

- (a) Mineral wools with a silica (SiO₂) content not less than 60% by weight;
- (b) Mineral wools with a silica (SiO₂) content less than 60% but with an alkaline oxide (K₂O or Na₂O) content exceeding 5% by weight or a boric oxide (B₂O₃) content exceeding 2% by weight.

Mineral wools which do not comply with the above specifications fall in Tax 68. 06.

5. Throughout the Nomenclature, the expression “ glass” includes fused quartz and other fused silica.

 - (b) The expression "platinum" means platinum, iridium, osmium, palladium, rhodium and ruthenium.
 - (c) The expression "precious or semi-precious stones" does not include any of the substances specified in Note 2 (b) to Chapter 96.
5. For the purposes of this Chapter, any alloy (including a sintered mixture and an inter-metallic compound) containing precious metal is to be treated as an alloy of precious metal if any one precious metal constitutes as much as 2%, by weight, of the alloy. Alloys of precious metal are to be classified according to the following rules:
 - (a) An alloy containing 2% or more, by weight, of platinum is to be treated as an alloy of platinum;
 - (b) An alloy containing 2% or more, by weight, of gold but no platinum, or less than 2%, by weight, of platinum, is to be treated as an alloy of gold;

6. Except where the context otherwise requires, any reference in the Nomenclature to precious metal or to any particular precious metal includes a reference to alloys treated as alloys of precious metal or of the particular metal in accordance with the rules in Note 5 above, but not to metal clad with precious metal or to base metal or nonmetals plated with precious metal.
7. Throughout the Nomenclature the expression "metal clad with precious metal" means material made with a base of metal upon one or more surfaces of which there is affixed by soldering, brazing, welding, hot-rolling or similar mechanical means a covering of precious metal. 6. Unless the context otherwise requires, any reference in the Nomenclature to a base metal includes a reference to alloys which, by virtue of Note 5 above, are to be classified as alloys of that metal.
7. Classification of composite products:

Except w, here the Tax otherwise require, products of base metal (including products of mixed materials treated as products of base metal under the Interpretative Rules) containing two or more base metals are to be treated as products of the base metal predominating by weight over each of the other metals. For this purpose:

 - (a) Iron and steel, or different kinds of iron or steel, are regarded as one and the same metal;
 - (b) An alloy is regarded as being entirely composed of that metal as an alloy of which, by virtue of Note 5, it is classified; and

These products may have indentations, ribs, grooves or other deformations produced during the rolling process (reinforcing bars and rods).

(l) Other bars and rods

Products which do not conform to any of the definitions at (i), (j) or (k) above or to the definition of wire, which have a uniform solid cross-section along their whole length in the shape of circles, segments of circles, ovals, rectangles (including squares) , triangles or other convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Not more than 0. 7% of carbon,

0. 5% or more but not more than 1. 9% of manganese, and

0. 6% or more but not more than 2. 3% of silicon, but no other element proportion that would give the steel the characteristics of another alloy steel.

2. For the classification of ferro-alloys in the Tax of Tax 72. 02 the following rule should be observed: A ferro-alloy is considered as binary and classified under the relevant Tax (if it exists) if only one of the alloy elements exceeds the minimum percentage laid down in Chapter Note 1 (c); by analogy, it is considered respectively as ternary or quaternary if two or three alloy elements exceed the minimum percentage.

For the application of this rule the unspecified "other elements" referred to in Chapter Note 1 (c) must each exceed 10% by weight

Chapter 73
Products of iron or steel

1. In this Chapter the expression “cast iron” applies to products obtained by casting in which iron predominates by weight over each of the other elements and which do not comply with the chemical composition of steel as defined in Note 1 (d) to Chapter 72.

2. In this Chapter the word “ wire” means hot or cold-formed products of any cross-sectional shape, of which no cross-sectional dimension exceeds 16 mm.

Chapter 74
Copper and products thereof

Notes:

In this Chapter the following expressions have the meanings hereby assigned to them:

1. Refined copper

Metal containing at least 99.85% by weight of copper; or metal containing at least 97.5% by weight of copper, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE-Other elements

Element		Limiting content % by weight
Ag	Silver	0.25
As	Arsenic	0.5
Cd	Cadmium	1.3
Cr	Chromium	1.4
Mg	Magnesium	0.8
Pb	Lead	1.5
S	Sulphur	0.7
Sn	Tin	0.8
Te	Tellurium	0.8
Zn	Zinc	1
Zr	Zirconium	0.3
Other elements *, each		0.3

* Other elements are, for example, Al, Be, Co, Fe, Mn, Ni, Si.

2. Copper alloys

Metallic substances other than unrefined copper in which copper predominates by weight over each of the other elements, provided that:

- (a) the content by weight of at least one of the other elements is greater than the limit specified in the foregoing table; or
- (b) the total content by weight of such other elements exceeds 2.5%

3. Master alloys

Alloys containing with other elements more than 10% by weight of copper, not usefully malleable and commonly used as an additive in the manufacture of other alloys or as de-oxidants, desulfurizing agents or for similar uses in the metallurgy of non-ferrous metals. However, copper phosphide (phosphor copper) containing more than 15% by weight of phosphorus falls in Tax 28.53.

4. Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products, with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of products or products of other Tax. Wire-bars and billets with their ends tapered or otherwise worked simply to facilitate their entry into machines for converting them into, for example, drawing stock (wire-rod) or tubes, are however to be taken to be unwrought copper of Tax 74.03.

5. Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of products or products of other Tax.

6. Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including “ flattened circles” and “ modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including “ modified rectangular”)cross-section exceeds one-tenth of the width.

7. Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of Tax 74. 03), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including “ modified rectangles” of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- (a)of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- (b)of a shape other than rectangular or square, of any size, provided that they do not assume the character of products or products of other Tax.

Tax 74. 09 and 74. 10 apply, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of products or products of other Tax.

8. Tubes and pipes

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be taken to be tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Note:

In this Chapter the following expressions have the meanings hereby assigned to them:

1. Copper-zinc base alloys (brasses)

Alloys of copper and zinc, with or without other elements. When other elements are present:

- (a) zinc predominates by weight over each of such other elements;
- (b) any nickel content by weight is less than 5% (see copper-nickel-zinc alloys (nickel silvers); and
- (c) any tin content by weight is less than 3% (see copper-tin alloys (bronzes)).

2. Copper-tin base alloys (bronzes)

Alloys of copper and tin, with or without other elements. When other elements are present, tin predominates by weight over each of such other elements, except that when the tin content is 3% or more the zinc content by weight may exceed that of tin but must be less than 10%,

3. Copper-nickel-zinc base alloys (nickel silvers)

Alloys of copper, nickel and zinc, with or without other elements. The nickel content is 5% or more by weight (see copper-zinc alloys (brasses)).

4. Copper-nickel base alloys

Alloys of copper and nickel, with or without other elements but in any case, containing by weight not more than 1% of zinc. When other elements are present, nickel predominates by weight over each of such other elements.

Chapter 75
Nickel and products thereof

Notes:

This Chapter the following expressions have the meanings hereby assigned them:

1. Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including “modified rectangular”) cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of products or products of other Tax.

2. Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, Lubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of products or products of other Tax.

3. Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex-polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including “modified rectangular”) cross-section exceeds one-tenth of the width.

4. Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of Tax 75. 02), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including “modified rectangles” of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

(a) of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

(b) of a shape other than rectangular or square, of any size, provided that they do not assume the character of products or products of other Tax.

Tax 75. 06 applies, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of products or products of other Tax.

5. Tubes and pipes

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular, or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Tax Notes:

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) Nickel, not alloyed

Metal containing by weight at least 99% of nickel and cobalt, provided that:

(i) the cobalt content by weight does not exceed 1.5%, and

(ii) the content by weight of any other element does not exceed the limit specified in the following table:

Table - Other elements

Element	Limiting content % by weight
Fe Iron	0.5
O Oxygen	0.4
Other elements, each	0.3

(b) Nickel alloys

Metallic substances in which nickel predominates by weight over each of the other elements provided that:

(i) the content by weight of cobalt exceeds 1.5%,

(i) the content by weight of at least one of the other elements is greater than the limit specified in the foregoing table, or

(iii) the total content by weight of elements other than nickel plus cobalt exceeds 1%.

2. Notwithstanding the provisions of Chapter Note 3, for the purposes of Tax 7508.10 the term “wire” applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6mm.

Chapter 76

Aluminum and products thereof

Notes:

In this Chapter the following expressions have the meanings hereby assigned them:

1. Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including “modified rectangular”) cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of products or products of other Tax.

2. Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of products or products of other Tax.

3. Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including “modified rectangular”) cross-section exceeds one-tenth of the width.

4. Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of Tax 76.01), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including “modified rectangles” of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- (a) of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- (b) of a shape other than rectangular or square, of any size, provided that they do not assume the character of products or products of other Tax.

Tax 76.06 and 76.07 apply, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of products or products of other Tax.

5. Tubes and pipes

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness.

Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Notes:

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) Aluminum, not alloyed

Metal containing by weight at least 99% of aluminum, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE - Other elements

Element	Limiting content % by weight
Fe + Si (iron plus silicon)	1
Other elements (1), each	0.1(2)

- (1) Other elements are, for example, Cr, Cu, Mg, Mn, Ni, Zn
- (2) Copper is permitted in a proportion greater than 0. 1% but not more than 0. 2%, provided that neither the chromium nor manganese content exceeds 0. 05%.

(b) Aluminum alloys

Metallic substances in which aluminum predominates by weight over each of the other elements, provided that:

- (i) the content by weight of at least one of the other elements or of iron plus silicon taken together is greater than the limit specified in the foregoing table;
- (ii) the total content by weight of such other elements exceeds 1%.

2. Notwithstanding the provisions of Chapter Note 1 (c), for the purposes of Tax 7616. 91 the term "wire" applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6mm.

Chapter 78

Lead and products thereof

Notes:

In this Chapter the following expressions have the meanings hereby assigned to them:

1. Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including “modified rectangular”) cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of products or products of other Tax.

2. Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of products or products of other Tax.

3. Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including “modified rectangular”) cross-section exceeds one-tenth of the width.

4. Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of Tax 78.01), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including “modified rectangles” of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

(a) of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

(b) of a shape other than rectangular or square, of any size, provide that they do not assume the character of products or products of other Tax.

Tax 78.04 applies, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of products or products of other Tax.

5. Tubes and pipes

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall

thickness.

Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the fore- going cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Tax Note:

In this Chapter the expression “refined lead” means:

Metal containing by weight at least 99. 9% of lead, provided that the content by weight of any other element does not exceed the limit specified in the following table:

Table-Other elements

Chapter 79

Zinc and products thereof

Notes:

In this Chapter the following expressions have the meanings hereby assigned them:

1. Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangle (including squares), equilateral triangles or regular convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including “ modified rectangular”) cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of products or products of other Tax.

2. Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not there- by assumed the character of products or products of other Tax.

3. Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares) , equilateral triangles or regular convex polygons (including “ flattened circles” and “ modified rectangles” , of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) . Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including “ modified rectangular”) cross-section exceeds one-tenth of the width

4. Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of Tax 79. 01), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including “ modified rectangles” of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

(a) of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

(b) of a shape other than rectangular or square, of any size, provided that they do not assume the character of products or products of other Tax.

Tax 79. 05 applies, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of products or products of other Tax.

5. Tubes and pipes

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness.

Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Tax Note:

In this Chapter the following expressions have the meanings hereby assigned to them:

1. Zinc, not alloyed

Metal containing by weight at least 97.5% of zinc.

2. Zinc alloys

Metallic substances in which zinc predominates by weight over each of the other elements, provided that the total content by weight of such other elements exceeds 2.5%.

3. Zinc dust

Dust obtained by condensation of zinc vapor, consisting of spherical products which are finer than zinc powders. At least 80% by weight of the products pass through a sieve with 63 micrometers (microns) mesh. It must contain at least 85% by weight of metallic zinc.

Chapter 80 Tin and products thereof

Notes:

In this Chapter the following expressions have the meanings hereby assigned to them:

1. Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including “modified rectangular”) cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of products or products of other Tax.

2. Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of products or products of other Tax.

3. Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including “modified rectangular”) cross-section exceeds one-tenth of the width.

4. Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of Tax 80.01), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including “modified rectangles” of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

(a) of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

(b) of a shape other than rectangular or square, of any size, provide that they do not assume the character of products or products of other Tax.

5. Tubes and pipes

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone shaped or fitted with flanges, collars or rings.

Tax Note:

In this Chapter the following expressions have the meanings hereby assigned to them:

1. Tin, not alloyed.

Metal containing by weight at least 99% of tin, provided that the content by weight of any bismuth or copper is less than the limit specified in the following table:

Table - Other elements	
Element	Limiting content % by weight
Bi Bismuth	0.1
Cu Copper	0.4

2. Tin alloys

Metallic substances in which tin predominates by weight over each of the other elements, provided that:

(a) the total content by weight of such other elements exceeds 1 %; or

(b) the content by weight of either bismuth or copper is equal to or greater than the limit specified in the foregoing table.

Chapter 83

Miscellaneous products of base metal

Notes:

1. For the purposes of this Chapter, parts of base metal are to be classified with their parent products. However, products of iron or steel of Tax 73.12, 73.15, 73.17, 73.18 or 73.20, or similar products of other base metal (Chapters 74 to 76 and 78 to 81) are not to be taken as part of products of this Chapter.

2. For the purposes of Tax 83.02, the word “castors” means those having a diameter (including, where appropriate, tyres) not exceeding 75mm, or those having a diameter (including, where appropriate, tyres) exceeding 75mm provided that width of the wheel or tyre fitted there to is less than 30mm.

This kind of equipment can be divided into lifting and horizontal moving type, vertical circulation type, horizontal circulation type, multi-layer circulation type, plane moving type, roadway stacking type, vertical lifting type and simple lifting type, which is mainly composed of steel structure parts, transmission system and control system.
3. The "crankshaft" mentioned in Tax 8483.1011 is a key part of marine diesel engine, which main function is to change the gas pressure acting on the piston into the rotating power of the transmission shaft (including the crankshaft) by cooperating with the connecting rod. Crankshaft is generally composed of main journal, connecting rod journal, crank, counter weight, front end and rear section.

Chapter 85

Electrical machinery and equipment and parts thereof; sound recorders and reproducers, television image and sound recorders and reproducers, and parts and accessories of such products

Notes:

1. This Chapter does not cover:

- (a) Electrically warmed blankets, bed pads, foot-muffs or the like; electrically warmed clothing, footwear or ear pads or other electrically warmed products worn on or about the person;
- (b) Products of glass of Tax 70. 11.
- (c) Machines and apparatus of Tax 84. 86;
- (d) Vacuum apparatus of a kind used in medical, surgical, dental or veterinary purposes (Tax 90. 18);
- (e) Electrically heated furniture of Chapter 94.

2. Tax 85. 01 to 85. 04 do not apply to goods described in Tax 85. 11, 85. 12, 85. 40, 85. 41 or 85.42. However, metal tank mercury arc rectifiers remain classified in Tax 85. 04.

3. Tax 85.07 called "battery", including auxiliary components together with its inspection, the auxiliary components has a power storage and power supply function, or protect the battery from damage, for example, circuit connector, temperature control device (e.g. , thermistor) and circuit protection device, may also include a battery partial protection housing.

4. Tax 85. 09 covers only the following electro-mechanical machines of the kind commonly used for domestic purposes:

- (a) Floor polishers, food grinders and mixers, and fruit or vegetable juice extractors, of any weight;
- (b) Other machines provided the weight of such machines does not exceed 20 kg.

The Tax does not, however, apply to fans or ventilating or recycling hoods incorporating a fan, whether or not fitted with filters (Tax 84. 14), centrifugal clothes-dryers (Tax 84. 21), dish washing machines (Tax 84. 22), household washing machines (Tax 84. 50), roller or other ironing machines (Tax 84. 20 or 84. 51), sewing machines (Tax 84.52), electric scissors (Tax 84. 67) or to electro-thermic appliances (Tax 85. 16).

5. For the purposes of Tax 85. 23:

- (a) "Solid-state non-volatile storage devices" (for example, "flash memory cards" or "flash electronic storage cards") are storage devices with a connecting socket, comprising in the same housing one or more flash memories (for example, "FLASH E²PROM") in the form of integrated circuits mounted on a printed circuit board. They may include a controller in the form of an integrated circuit and discrete passive components, such as capacitors and resistors;
 - (b) The term "smart cards" means cards which have embedded in them one or more electronic integrated circuits (a microprocessor, random access memory (RAM) or read-only memory (ROM)) in the form of chips. These cards may contain contacts, a magnetic stripe or an embedded antenna but do not contain any other active or passive circuit elements.
6. For the purposes of Tax 85. 34 "printed circuits" are circuits obtained by forming on an insulating base, by any printing process (for example, embossing , plating-up, etching) or by the "film circuit" technique, conductor elements, contacts or other printed components (for example, inductances, resistors, capacitors) alone or interconnected according to a pre-established pattern, other than elements which can produce, rectify, modulate or amplify an electrical signal (for example, semiconductor elements).

The expression "printed circuits" does not cover circuits combined with elements other than those obtained during the printing process, nor does it cover individual, discrete resistors, capacitors or inductances.

Thin or thick-film circuits comprising passive and active elements obtained during the same technological process are to be classified in Tax 85. 42.

7. For the purpose of Tax 85.36. "connectors for optical fibers, optical fiber bundles or cables" means connectors that simply mechanically align optical fibers end to end in a digital line system. They perform on other function, such as the amplification, regeneration or modification of a signal.

8. Tax 85. 37 does not include cordless infrared devices for the remote control of television receivers or other electrical equipment (Tax 85.43).

9. For the purposes of Tax 85. 41 and 85. 42:

- (a) "Diodes, transistors and similar semiconductor devices" are semiconductor devices the operation of which depends on variations in resistivity on the application of an electric field;
- (b) "Electronic integrated circuits" are:
 - (i) Monolithic integrated circuits in which the circuit elements (diodes, transistors resistors capacitors, interconnections, etc.) are created in the mass (essentially) and on the surface of a semiconductor or compound semiconductor material (for example, doped silicon, gallium arsenide silicon, germanium indium phosphide) and are inseparably associated;
 - (ii) Hybrid integrated circuits in which passive elements (resistors, capacitors, inductances) , obtained by thin-or thick film technology, and active elements (diodes, transistors, monolithic integrated circuits, etc.), obtained by semiconductor technology, are combined to all intents and purposes indivisibly, by interconnection or interconnecting cables on a single insulating substrate (glass, ceramic, etc.). These circuits may also include discrete components;
 - (iii) Multichip integrated circuits consisting of two or more interconnected monolithic integrated circuits combined to all intents and purposes indivisibly, whether or not on one or more insulating substrates, with or without lead-frames, but with no other active or passive circuit elements.

For the classification of the products defined in this Note, Tax 85.41 and 85.42 shall take precedence over any other Tax in

the Nomenclature which might cover them by reference to, in particular, their function, but except for cases related to Tax 85.23.

(iv) Multi element integrated circuit (MCOs) is composed of one or more single, mixed or multi chip integrated circuit and at least containing one of the following components: the combination of silicon sensor, actuator, oscillator, resonator or its components, or with Tax 85.32, 85.33, 85.41 items of commodities listed in the function components, or inductors of Tax 85.04. In fact, the same is inseparably integrated like integrated circuits, as an components, through the pin, lead wire, solder ball, bottom contact, bump or conductive pressure points are connected to the printed circuit board assembly (PCB) or other carrier, through the connecting of pins, leads, balls, lands, bumps, or pads.

For the purpose of this definition:

(i) “Components” may be discrete, manufactured independently then assembled onto the rest of the MCO, or integrated into other components.

(ii) “Silicon based” means built on a silicon substrate, or made of silicon materials, or manufactured onto integrated circuit die.

(iii) a) Silicon based sensors consist of microelectronic or mechanical structures that are created in the interior or on the surface of a semiconductor and that have the function of detecting physical or chemical quantities and transducing these into electric signals, caused by resulting variations in electric properties or displacement of a mechanical structure. “Physical or chemical quantities” relates to real world phenomenal, such as pressure, acoustic waves, acceleration, vibration, movement, orientation, strain, magnetic field strength, electric field strength, light, radioactivity, humidity, flow, chemical concentration, etc.

b) “Silicon based actuators” consist of microelectronic and mechanical structures that are created in the mass or on the surface of a semi-conductor and that have the function of converting electrical signals into physical movement.

c) “Silicon based resonators” are components that consist of microelectronic or mechanical structures that are created in the mass or on the surface of a semiconductor and have the function of generating a mechanical or electrical oscillation of a predefined frequency that depends on the physical geometry of these structures in response to an external input.

d) “Silicon based oscillators” are active components that consist of micro-electronic or mechanical structures that are created in the mass or on the surface of a semiconductor and that have the function of generating a mechanical or electrical oscillation of a predefined frequency that depends on the physical geometry of these structures.

10. For the purposes of Tax 85.48, spent primary cells, “spent primary batteries and spent electric accumulators” are those which are neither usable as such because of breakage, cutting-up, wear or other reasons, nor capable of being recharged.

Tax Notes:

Tax 8527.12 cover only cassette players with built-in amplifier, without built-in loudspeaker, capable of operating without an external source of electric power and the dimensions of which do not exceed 170mm x 100 mm x 45mm

Notes in our country:

The “pump coffee machine” in Tax 8516.7130 is mainly composed of water tank, water pump, heater, funnel, microcomputer-controlled parts and accessories. The water tank is connected with the water pump and controls the pump to draw water from the water tank to the heater through the microcomputer-controlled parts. After heating the water through the heater, the pressure supplied by the pump causes the hot water to flow into the pressure filtration funnel of the lower part of the heater, and the hot water filters out the essence of the coffee powder in the pressure filtering funnel, and simultaneously produces rich foam through the small holes in the filter.

A part or accessory which answers to a description in two or more of the Tax of those Chapters is to be classified under that Tax which corresponds to the principal use of that part or accessory.
4. For the purposes of this Section:
 - (a) Vehicles specially constructed to travel on both road and rail are classified under the appropriate Tax of Chapter 87;
 - (b) Amphibious motor vehicles are classified under the appropriate Tax of Chapter 87;
 - (c) Aircraft specially constructed so that they can also be used as road vehicles are classified under the appropriate Tax of Chapter 88.
5. Air-cushion vehicles are to be classified within this Section with the vehicles to which they are most akin as follows:
 - (a) In Chapter 86 if designed to travel on a guide-track (hovertrain);
 - (b) In Chapter 87 if designed to travel over land or over both land and water;
 - (c) In Chapter 89 if designed to travel over water, whether or not able to land on beaches or landing stages or also able to travel over ice.Parts and accessories of air-cushion vehicles are to be classified in the same way as those of vehicles of the Tax in which the aircushion vehicles are classified under the above provisions.
Hovertrain track fixtures and fittings are to be classified as railway track fixtures and fittings, and signaling, safety or traffic control equipment for hovertrain transport systems as signaling, safety or traffic control equipment for railways.

1. This Chapter does not cover railway or tramway rolling-stock designed solely for running on rails.
2. For the purposes of this Chapter, "tractors" means vehicles constructed essentially for hauling or pushing another vehicle, appliance or load, whether or not they contain subsidiary provision for the transport, in connection with the main use of the tractor, of tools, seeds, fertilizers or other goods.

Machines and working tools designed for fitting to tractors of Tax 87.01 as interchangeable equipment remain classified in their respective headings even if presented with the tractor, and whether or not mounted on it.

3. Motor chassis fitted with cabs shall be classified in Tax 87.02 to 87.04, and not in Tax 87.06.
4. Tax 87.12 includes all children's bicycles. Other children's cycles shall be classified in Tax 95.03.

2. Subject to Note 1 above, parts and accessories for machines, apparatus, instruments or articles of this Chapter are to be classified according to the following rules:

- (a) Parts and accessories which are goods included in any of the Tax of this Chapter or of Chapter 84, 85 or 91 (other than Tax 84. 87, 87. 48 or 90. 33) are in all cases to be classified in their respective Tax;
- (b) Other parts and accessories, if suitable for use solely or principally with a particular kind of machine, instrument or apparatus, or with a number of machines, instruments or apparatus of the same Tax (including a machine, instrument or apparatus of Tax 90. 10, 90. 13 or 90. 31) are to be classified with the machines, instruments or apparatus of that kind;
- (c) All other parts and accessories are to be classified in Tax 90.33

3. The provisions of Notes 3 and 4 to Section III or XVI apply also to this Chapter.

4. Tax 90. 05 does not apply to telescopic sights for fitting to arms, periscopic telescopes for fitting to submarines or tanks, or to telescopes for machines, appliances, instruments or apparatus of this Chapter of Section XVII; such telescopic sights and telescopes are to be classified in Tax 90. 135. Measuring or checking optical instruments, appliances or machines which, but for this Note, could be classified both in Tax 90. 13 and in Tax 90. 31 are to be classified in Tax 90. 31.

6. For the purposes of Tax 90. 21, the expression "orthopedic appliances" means appliances for:

Preventing or correcting bodily deformities;

Supporting or holding parts of the body following an illness, operation or injury.

Orthopedic appliances include footwear and special insoles designed to correct orthopedic conditions, provided that they are either:

- (a) Customized
- (b) mass-produced, presented singly, and not in pairs and designed to fit either foot equally

7. Tax 90. 32 applies only to:

- (a) Instruments and apparatus for automatically controlling the flow, level, pressure or other variables of liquids or gases, or for automatically controlling temperature, whether or not their operation depends on an electrical phenomenon which varies according to the factor to be automatically controlled; which are designed to bring this factor to, and maintain it at, a desired value, stabilized against disturbances, by constantly or periodically measuring its actual value;
- (b) Automatic regulators of electrical quantities, and instruments or apparatus for automatically controlling non-electrical quantities the operation of which depends on an electrical phenomenon varying according to the factor to be controlled, which are designed to bring this factor to, and maintain it at, a desired value, stabilized against disturbances, by constantly or periodically measuring its actual value.
